### Project Overview

The California High-Speed Rail Authority (Authority) continues to advance work to deliver the nation's first high-speed rail (HSR) system. The Los Angeles to Anaheim (LA-A) Project Section, an approximate 30-mile corridor, connects Los Angeles Union Station (LAUS) to the Anaheim Regional Transportation Intermodal Center (ARTIC) by traveling along the existing Los Angeles to Anaheim rail corridor which serves both freight and passenger service. The LA-A Project Section traverses the cities of Los Angeles, Vernon, Commerce, Bell, Montebello, Pico Rivera, Norwalk, Santa Fe Springs, La Mirada, Buena Park, Fullerton, and Anaheim and portions of unincorporated Los Angeles County. The statewide high-speed rail program and its LA-A Project Section contribute to economic development, a cleaner environment, and job creation while investing in regional and local rail lines to meet California's 21st century transportation needs.

### Join Us at the Community Meeting

The Authority is hosting a virtual community meeting for the LA-A Project Section. The meeting will focus on providing information on the LA-A Preferred Alternative being studied as part of the forthcoming Draft Environmental Impact Report/Environmental Impact Statement (Draft EIR/EIS). Project features highlighted at the meeting will include grade separations, HSR stations, Metrolink station relocations, light maintenance facility options, local safety improvements, and more.

The Authority is finalizing technical studies and anticipates releasing the Draft EIR/EIS in 2025. This meeting will also provide information for stakeholders to understand the public comment process once the document is released.
